HVAC REBATES

[REDUCETHEUSE.com/hb](http://REDUCETHEUSE.com/hb)

## “U.S. office buildings waste one-third or more of the total energy they consume.”

— U.S. Environmental Protection Agency’s ENERGY STAR® Commercial Properties, Climate Protection Partnerships Division/  
[www.energystar.gov](http://www.energystar.gov)

Reduce the Use: Business is the commercial component of Santee Cooper’s comprehensive, decade-long Reduce the Use program intended to lower the overall use of electricity.

**OPERATE MORE EFFICIENTLY:** The Reduce the Use: Business program offers rebates and incentives to encourage businesses to adopt more energy-efficient technologies and procedures. In addition, lower energy consumption may result in monetary savings for your business.

**THE FINANCIAL IMPACT OF ENERGY-EFFICIENT HVAC SYSTEMS:** HVAC systems can be a significant energy load for businesses. It is important to keep these systems operating efficiently. Given its bottom line impact, facility managers looking to trim operating costs should focus in on this important target.

### Business Prescriptive Rebate Program

The initial phase of Reduce the Use: Business features the Business Prescriptive Rebate Program which includes four measures: Lighting, HVAC, Building Envelope and Commercial Refrigeration. The HVAC Rebates are described briefly below:

**HVAC REBATES:** Includes rooftop units, split systems, unitary AC and heat pump equipment, chillers, VFDs for air handlers, duct sealing/insulation, heat pump tune-ups and quality installations.

**REBATES:** \$10 to \$75+ per ton, depending on equipment type and efficiency. \$100 to \$200 per system for quality installation, heat pump tune-ups or duct sealing/insulation.

**CONSULT ONE OF OUR TRADE ALLIES:** Every business’s HVAC system requirements are different. A Trade Ally can help you plan for the conversion to more efficient technology and give you detailed estimates on energy-efficient upgrades, rebates, installation costs and projected energy savings, payback, ROI and asset valuation for your business.

For complete program details and a list of our Trade Allies, visit **REDUCETHEUSE.com/hb** and click on Business.
