

The Big Game is Going Green

The Rivalry has a new color

It's green!

For the first time, the famed and historic rivalry of the Clemson-Carolina football game will be powered by 100% in state renewable energy.

Clemson University has teamed up with Blue Ridge Electric Cooperative and Santee Cooper to ensure all the electricity needs of the Big Game, on Nov. 27, 2010 at Clemson, will be produced by Green Power. Green Power is clean, renewable energy generated from resources right here in South Carolina.

Now that's a victory, no matter which team you support!

“Universities are in the ‘forever business,’” said Clemson University President James Barker. “It’s hard to get more forever than renewable energy.”

We invite you to join us and catch the green... Green Power! It has the power to change the way we all see the world, whether you bleed orange or garnet. For more insight, visit www.santeecooper.com/greenpower
